SUMMARY

Determined and motivated programmer with strong skills in C and Python, and a solid understanding of Data Structures and Algorithms in C++.

EDUCATION

Sai Vidya Institute of Technology	2023–present
Bachelor of Engineering, CSE	Cumulative: 9.41
Jawahar Navodaya Vidyalaya	2021–2023
12th grade	Percentage: 85.6

SKILLS

- **Softwares known:** C, C++, Python, HTML, CSS, MongoDB, MySQL (Technical skills: Intermediate)
- **Frameworks & Libraries :** FastAPI, Flask, Streamlit, PyTorch, TensorFlow, NumPy, Pandas, OpenCV
- **Tools & platforms :** Git, GitHub, Docker, AWS
- **Communication:** Written and Oral Communication: Kannada, English, Hindi (Language Proficiency: Medium)

PROJECTS

- **AI-Driven Emotion Classification and Conversational Companion** | *Python, Flask, PyTorch, DistilBERT, FLAN-T5 Small*
Developed a comprehensive AI chatbot utilizing a fine-tuned DistilBERT model for real-time text and speech emotion detection, and a FLAN-T5 Small pretrained model to generate contextually aware, empathetic responses. Integrated specialized emotion recognition datasets, including support for the Kannada language, into a full-stack web interface to facilitate interactive user engagement.
- **PatchOps: AI Incident Resolution Hub** | *Python, FastAPI, JavaScript, Tailwind CSS, Gemini API, AWS*
Developed an intelligent incident management platform featuring automated AI root cause analysis, real-time architecture impact diagrams with Mermaid.js, Git diff code patch generation, and seamless integrations with Slack, Jira, and GitHub APIs
- **AI-Powered Custom Form Builder** | *Python, Flask, HTML, CSS, Javascript*
Developed an intelligent form management platform featuring AI-generated forms, automated response analysis with visual charts, chatbot-assisted form creation, and CSV-based response storage.

ACTIVITIES & ACHIEVEMENTS

- **CideCode Hackathon (PES University):** Built a full-stack OSINT platform integrating multi-platform social media data with AI-driven behavior analysis and automated API aggregation.
- **HackVerse Hackathon (Round 2 Qualifier):** Developed a Flutter-based tourist recommendation system generating personalized destination suggestions and budget-aware travel itineraries.

CERTIFICATIONS

- Artificial Intelligence Fundamentals - IBM SkillsBuild | Aug 2025
- Google Cloud Career Launch Pad Generative AI Leader track - GoogleCloud
- MongoDB Python Developer - MongoDB | Feb 2026
- 100 Days of Code™: The Complete Python Pro Bootcamp – Udemy | Jul 2026
- Master Generative AI & Generative AI Tools (ChatGPT & more) - Udemy | Sept 2025
- Generative AI Guide: DALL-E, ChatGPT & Creativity with AI - Udemy | Dec 2025
- Deep Learning, NPTEL - Indian Institute of Technology Ropar (Elite + Silver, Score: 73%, Apr 2026)

PATENT AND RESEARCH WORK

- **Patent Published - “Sakhi: AI with a Touch of Humane” (2025)** - Indian Patent Office, 2025. Patent No: 2025411112549
- Designed and fine-tuned FLAN-T5 Small transformer-based conversational AI model using emotion-labeled datasets, implementing full NLP training pipeline including preprocessing, tokenization, fine-tuning using HuggingFace, PyTorch and Google Colab.
